

Press Release

Novavisions AG acquires Bloxolid GmbH

Isernhagen, 18 April 2018

On Wednesday, 18 April, the Bloxolid GmbH made its first public appearance at the fifth Hannover Blockchain Meetup. The event provided the opportunity to present the company's mission and roadmap at the KPMG Ignition Center in Hannover in front of 200 attendees.

Today, the Bloxolid GmbH presented its mission to innovate the trade of precious metals via modern technologies, for the first time ever. At the Hannover Blockchain Meetup #5 the CEO, Dr. Cord H. Burchard, highlighted the core ideas and advantages of the company, as well as giving insight into future projects. The positive interest shown in conversations following the presentation sparked future partnerships. This series of meetups, the aim of which is to be a platform for experts and people fascinated by blockchain, therefore provided an ideal opportunity for the first public appearance.

About the Bloxolid GmbH

Bloxolid's mission is to combine traditional assets with innovative blockchain technology to create a new class of safe and stable investments. Founded in Hanover in December 2017, the company is currently developing its first product, ARG3NTUM: The first cryptocurrency fully backed by silver – made in Germany. With an array of defining advantages, Bloxolid is setting the standard for the trade of true values. By offering inexpensive conditions, simple transaction processes and high transparency, the company wants to revolutionise the trade of precious metals, as well as establishing itself as the safe investment choice in the crypto market.
