

Press Release

Novavisions becomes Bloxolid AG: Merger of Bloxolid GmbH and Novavisions AG successfully decided on 18 July 2018.

Rotkreuz, 24 July 2018

Rotkreuz (Switzerland), July 24, 2018 - At the Annual General Meeting last Wednesday, the merger of Bloxolid GmbH with Novavisions AG into the new Bloxolid AG was decided. The former Board of Directors will be extended by Dr. Cord H. Burchard and Clemens Schuerhoff. On August 23, 2018, the premiere event of the first Bloxolid product called ARG3NTUM will take place at the headquarters of Bloxolid.

As announced by Novavisions AG in mid-May 2018, the official resolution for the takeover of Bloxolid GmbH was made at the AGM on 18 July 2018. For this purpose, 58,000,000 new shares were created. In addition to the extension of the administrative council positions of Adrian Knapp and Markus Bernhard, the acceptance of Dr. Cord H. Burchard, CEO of Bloxolid GmbH, as Chairman of the Board and Clemens Schuerhoff, Member of the Board of Kommalpha AG, was decided.

For details on the development and further planning of Bloxolid and the first product called ARG3NTUM a separate event will be held on August 23, 2018 in Isernhagen close to Hanover. Here, the cryptocurrency ARG3NTUM, which is completely backed by physical silver, celebrates its premiere - a highlight will be given by the first real transaction of ARG3NTUM on the Stellar Blockchain. Interested parties have the following link to register for the event:

About Bloxolid GmbH

Bloxolid's mission is to combine traditional assets with innovative blockchain technology to create a new class of safe and stable investments. Founded in Hanover in December 2017, the company is currently developing its first product, ARG3NTUM: The first cryptocurrency fully backed by silver - made in Germany. With an array of defining advantages, Bloxolid is setting the standard for the trade of true values. By offering inexpensive conditions, simple transaction processes and high transparency, the company wants to revolutionise the trade of precious metals, as well as establishing itself as the safe investment choice in the crypto market.
